COMPLETELY
REDESIGNED
RAISED PANEL

The new Novik® raised panel shutter has been completely redesigned to offer a classic and refined design while keeping all the benefits it already offered.

Our designers came up with a linear system that allows adjustment at every ¼ inch, without any visible cut marks for a perfect result each time, every time! The wood grain finish was reworked for an even more authentic and natural look.

The finishing touch that will add beauty and charm!
